Profile Summary

Software Engineering graduate (2026) with hands-on experience in Java, Python, and full-stack development, along with exposure to GenAI-powered applications and automation tools. Strong foundation in Data Structures, Algorithms, OOP, DBMS, and Software Development Life Cycle (SDLC). Built projects involving AI-based recommendation systems, local LLM applications, and web technologies, with a strong interest in scalable software engineering and problem solving.

Education

Institute of Aeronautical Engineering – Dundigal, Hyderabad	Nov 2022 – May 2026
Information Technology	CGPA: 7.5
Bhashyam IIT JEE Jr College – Kukatpally, Hyderabad	April 2022
MPC	Percentage: 75%
Bhashyam High School – Kukatpally, Hyderabad	May 2020
SSC	GPA: 10.0

Technical Skills

Programming: Java, Python, JavaScript, C

Core CS Concepts : Data Structures & Algorithms, OOP, DBMS, Operating Systems, SDLC

Web & Backend: HTML, CSS, React, REST APIs

Database: MySQL

AI & GenAI Exposure : LangChain, Ollama, LLaMA3, TensorFlow, OpenCV

Tools: Git, GitHub, VS Code

Soft Skills: Analytical Thinking, Communication, Team Collaboration

Projects

Chat With PDF	May 2025
Built and implemented a local PDF QA tool using Python and LLaMA3 (via Ollama) with PyMuPDF and SentenceTransformers for offline, context-aware querying—no internet or APIs required. Supports multi-page document handling and efficient context chunking for better accuracy. Enabled offline document question-answering with efficient context chunking. Technologies Used: Python, PyMuPDF, Ollama, LLaMA3, SentenceTransformers, NumPy	
Harmonizing Emotions and Climate using Music Personalization	Nov 2024
Built and implemented a mood-based music recommendation system using live video analysis, facial emotion detection, and weather API integration to generate personalized Telugu playlists. Applied deep learning models for emotion recognition and real-time sentiment and climate data fusion. Technologies Used: Python, TensorFlow, Keras, OpenCV, Pandas, Spotipy, Tkinter, PIL, CSV, WeatherAPI.	
Auto WhatsApp Messenger	Apr 2025
Built and implemented a Python-based application to automate sending WhatsApp messages to multiple contacts by uploading a CSV file containing numbers and custom messages. This tool bypasses manual typing and improves efficiency for mass communication. Reduced manual messaging effort by automating bulk communication workflows. Technologies Used: Python, PyWhatKit, Tkinter (for GUI), Pandas (for CSV handling)	

Certificates

AWS Academy Cloud Foundations – AWS

AI-ML – Woosong University (Korea)

AI-ML – Google Developers

Cybersecurity – Cisco

HackerRank Certifications: SQL | Java

Coding Profiles

LeetCode — 200+ problems, 5 contests.

HackerRank — Python (4 star), SQL (3 star), Java (2 star).

GeeksforGeeks — 80 problems.
